## Put Your Best Face Forward Into Fall

### Lose the Double Chin with KYBELLA

It doesn't matter what we weigh--there's one place a full 67% of us, men and women, feel we're carrying too much fullness: under the chin. Whether you call it submental fullness, as doctors do, or the dreaded double chin, that fat accumulating under our faces bothers most of us just as much as wrinkles and lines.

A double chin can be the result of many things--added weight (even if we've already lost it!), genetics, aging. But there's one treatment FDA-approved to address it, and we have it: **KYBELLA**.

**KYBELLA** is an injectable solution that safely targets and destroys fat cells under the chin. The fat dissolves and is eliminated naturally, and can't accumulate in those cells again.

This month, we're offering \$100 off each vial\* of KYBELLA! Call or [email](#) today to schedule your complimentary consultation with our cosmetic consultant Mary Lou.

\*Every patient is different. Your consultation will determine how many vials you'll need.
