## A Word About Injectable Filler Prep

### How to Get the Best Out of Your Filler Treatment

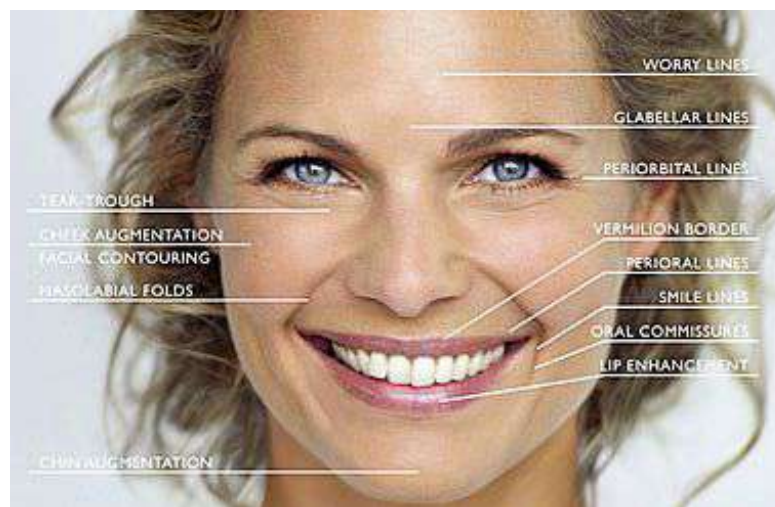

Injectable fillers are wonder workers when it comes to smoothing fine lines and creases, restoring youthful volume, and giving us kissable lips. But they can cause pesky bruising ... so whether you're planning to join us on March 14 or have scheduled injectable treatment sometime soon, keep these hints in mind for a better experience:

**1. Stop taking** blood-thinning medications or supplements a few days in advance. These include aspirin, NSAIDS (e.g. Advil, Aleve), and fish oil, among others. If you are taking a prescription blood thinner for a medical condition such as DVTs, see your physician before scheduling injectable treatment.

**2. Start taking** arnica pills. Arnica is a natural herb-based supplement available over the counter that helps prevent bruising. Follow product directions.

These two easy steps will help you get glowing results.
