Introducing EMSCULPT NEO: Lose Stubborn Fat, Tone Muscle

BIG ANNOUNCEMENT!!!

We're so happy to announce that Comprehensive Dermatology Center of Pasadena has officially acquired EMSculpt Neo!

We're very excited to introduce this game-changing technology, and to help you achieve your dream body.

AFTER **EMSCULPT^{neo}**

What is **EMSCULPT NEO**? And why are all the celebrities using it?

EMSCULPT NEO is the first and only non-invasive body shaping procedure that provides simultaneous fat elimination and muscle building in a combined 30-minute session.

It is specially designed and has been proven to reduce fat by 30% and build muscle by 25%, on average.

EMSCULPT NEO is a device that works by simultaneously emitting both **radiofrequency (RF)** and **high-intensity electro-magnetic (HIFEM+)** energies, resulting in more fat reduction and more muscle growth than any single gold-standard treatment -- **in LESS TIME** and **for LESS MONEY**.

The Results Speak for Themselves

What can EMSCULPT NEO do for you?

EMSCULPT NEO addresses those stubborn problem areas -- muffin top, love handles, beer belly, saddlebag thighs, batwings -- by dissolving fat cells and building strong, lean muscle to leave you

taught and toned in as few as 4 weekly 30-minute sessions.

Check out these photos. Then call or [email](#) to schedule your complimentary consultation (in-person or virtual) with our cosmetic consultant **Mary Lou**.
