## Sculptra for GLP Beauty Preservation: Your Youthful Contours at Big Savings

You expected to lose weight, not your youthfulness and glow. Losing weight feels great, but it can also accelerate facial skin changes that make you look older than you are. Facial volume loss (sometimes referred to as "Ozempic face") can lead to lackluster and sagging skin, especially in the cheek and jaw area. This is due to the reduction of the collagen and elastin that give your skin firmness and texture.

Now, you can enhance your weight loss success with an aesthetic injectable treatment for facial sagging during and post weight loss that helps improve your appearance with natural-looking results. **Sculptra** works gradually to restore and refresh your facial skin, improving wrinkles while restoring volume, contour, definition, and confidence.

For best results, treat with one vial of **Sculptra** for every decade of your age. It's done in a series and once fully corrected results can last up to two years.

**This month only, prepay \$2850 for 3 vials of Sculptra and receive one vial FREE! You save \$950!**

And talk to us about other **GLP Beauty Preservation** treatments and packages!
